Elsayed Galal Mouawad

Senior Data Analyst & Business Intelligence Specialist

Saudi Arabia | +966561031084 | Elsayedg637@gmail.com | linkedin.com/in/elsayed-galal | github.com/ElsayedGalal

PROFESSIONAL SUMMARY

Business Intelligence Specialist & Senior Data Analyst with proven expertise in enterprise Power BI deployment, Star Schema data modeling, and advanced DAX. Proficient in SQL query optimization, Python-driven ETL pipelines, and designing unified semantic layers. Leverages a Computer Science foundation alongside MBA studies to deliver structured data models, automated workflows, and high-impact decision support tools.

TECHNICAL SKILLS & CORE COMPETENCIES

- BI Architecture & Modeling: Enterprise Power BI, Kimball Dimensional Modeling (Star / Snowflake Schema), Advanced DAX (Context Transition, Time Intelligence), Semantic Layer Design, Row-Level Security (RLS), Tabular Editor.
- Databases & Data Engineering: SQL / MySQL (Advanced Window Functions, CTEs, Query Optimization, Indexing), Power Query (M-Language, Query Folding), Automated Data Pipeline Design, Database Normalization.
- Automation, Scripting & Applied AI: Python (Pandas, NumPy for data pipelines), REST API Data Ingestion, Automated ETL Workflows, YOLOv8 Computer Vision (Real-Time Safety & Compliance Telemetry), React (Custom UI Analytics).
- Strategic Analytics & Business Acumen: KPI Framework Design, Customer Experience Analytics (CSAT, CES, NPS), Unit Economics (LTV, CAC), Financial & Cost Variance Modeling, Advanced Excel (Power Pivot, Dynamic Arrays), Agile / Scrum, Git.

PROFESSIONAL EXPERIENCE

Senior Data Analyst | Ithraa Al-Joud Company (Hajj Season 1447)
March 2026 - July 2026 | Makkah, KSA

- Enterprise BI Architecture: Architected end-to-end analytical pipelines for the Beneficiary Satisfaction Department, processing high-velocity, multilingual feedback telemetry across 20+ operational service centers.
- Semantic Modeling & KPI Design: Engineered Kimball-compliant Star Schema models and advanced DAX measures to dynamically track CSAT, CES, and NPS indices with automated threshold alerts for operational leadership.
- Pipeline Automation: Streamlined automated feedback ingestion protocols from on-ground digital touchpoints, slashing data aggregation latency and executive reporting cycles by over 60%.
- Digital Engagement Analytics: Governed telemetry tracking for interactive operational platforms (Happiness Makers), delivering behavioral engagement models that directly elevated beneficiary satisfaction scores.

Data Analyst | Rising Ray Company
April 2024 - March 2026 | Makkah, KSA

- Operational Risk Intelligence: Built and deployed a centralized compliance analytics suite in Power BI for the Risk Identification unit, tracking multi-branch operational violations in real time.
- Root-Cause Pattern Discovery: Led longitudinal diagnostic investigations across multi-year incident data, isolating systematic failure modes to directly drive strategic corporate risk-mitigation initiatives.
- Data Pipeline Integrity: Authored advanced Power Query (M-Language) transformation workflows, eliminating data redundancy across enterprise reporting repositories and establishing verified data consistency.

Freelance BI and Analytics Consultant | Jabal Omar Development Company
November 2025 - December 2025 | Makkah, KSA

- Executive Dimensional Dashboard: Synthesized 36 months of longitudinal hospitality, retail, and revenue performance records into an enterprise-grade Power BI model to serve as the unified source of truth.
- Yield & Seasonality Modeling: Formulated advanced DAX time-intelligence models to isolate demand elasticities, booking cycles, and asset revenue yields, cutting C-suite reporting lead time substantially.

Data Analyst | Ithraa Al-Joud Company (Hajj Season 1446)
May 2025 - July 2025 | Makkah, KSA

- Quality Operations Suite: Deployed 5 operational Power BI dashboards tracking field service SLAs, critical incident logs, and resource allocation under high-density crowd conditions.
- Cross-Functional Data Auditing: Partnered with executive quality leads to audit operational bottlenecks, translating raw field telemetry into measurable SLA enforcement workflows.

Business Analyst & Administrative Director | TaQnia Company
February 2023 - March 2024 | EGYPT

- Commercial & Financial Governance: Directed operational workflows and financial administration, orchestrating departmental budgeting, CAPEX/OPEX allocation, and cost-accounting models.
- Profitability & Supply Chain Modeling: Built cost-variance analytical frameworks and procurement tracking dashboards, optimizing commercial supply chain expenditures and safeguarding operational margins.

Data Analyst | KB Denim Company
July 2022 - January 2023 | EGYPT

- Manufacturing Analytics: Developed production performance models using Power BI and Advanced Excel (Power Pivot) to track machine cycle times, defect distributions, and operational throughput variances.

PROJECTS

C4I Logistics Resilience Control Tower & Simulator | *Lead Architect & BI Developer*

- Architected a live C4I platform (c4i-logistics-command.vercel.app) modeling maritime chokepoints via 4,000 Monte Carlo simulations, proving a 17-day Saudi Land Bridge transit that saves $1,418/FEU in war risk and cuts CO2 by 35%.

Al-Matrafi Smart Operations AI Platform | *Python, AI Telemetry, Operational Dashboards*

- Architected an intelligent field analytics system converting unstructured voice logs into real-time operational KPIs, eliminating manual reporting latency across decentralized sites.

Enterprise Cloud Asset Management System | *Cloud App, Relational Modeling, Cost Analytics*

- Engineered a live cloud platform modeling relational depreciation curves and maintenance metrics to optimize asset lifecycle costs.

AI Safety Sentinel: Industrial Compliance | *YOLOv8, Computer Vision, Python Telemetry*

- Deployed an edge computer vision pipeline automating PPE compliance detection, streaming violation telemetry directly into operational safety dashboards.

Beneficiary Experience & Sentiment Engine | *Power BI, Advanced DAX, Star Schema*

- Engineered a Kimball Star Schema model with dynamic DAX measures to calculate real-time CSAT, CES, and NPS across 20+ decentralized service hubs.

EDUCATION

Master of Business Administration (MBA)
Royale Business College - United Kingdom | June 2026 - Present (In Progress)
Strategic Focus: Business Strategy, Financial Decision Modeling, Operational Performance & Cost Optimization.

Bachelor of Science in Computer Science & Information Systems
Faculty of Computers and Information - Zagazig University | September 2016 - May 2020
Technical Foundation: Database Management Systems (RDBMS), Software Engineering, Algorithms & Data Structures.

CERTIFICATIONS & PROFESSIONAL CREDENTIALS

- Microsoft Certified: Power BI Data Analyst Associate (PL-300 Candidate).
- IBM Data Analyst Professional Certificate | IBM & Coursera (June 2023) - 9-Course Specialization: Advanced SQL, Python Analytics, Cognos BI, and Dashboard Architecture.
- Data Analysis Professional Nanodegree | Udacity & MCIT Egypt - FWD (November 2022) - Rigorous training in exploratory data analysis, data wrangling, and statistical modeling.
- Mobile Application Developer Mastery Award | IBM Skills Academy (August 2018) - Awarded by IBM Global University Programs for software and application engineering.
- Digital Competencies & Office Productivity Tools | Universitat Autònoma de Barcelona (June 2023).

LANGUAGES

- Arabic: Native.
- English: Professional Working Proficiency (CEFR B2 Upper Intermediate | EF SET Certified).
